

Rapid Diver Operations

This class is designed to give the operator the knowledge, skills, and abilities to safely operate a first in Rapid Diver diving system. The class goes over the capabilities, limitations, and design parameters of using this unique piece of rescue gear.

The rapid Diver OPS course prepares the student for the following:

- Equipment preparation, problem solving, responding to a call, search patterns, scene evaluation, environmental risks. The diver will learn the strengths and limitations of the equipment.
- Dive skills including rapid deployment from a vehicle, diver communication, victim recovery, emergency procedures, and decontamination procedures.
