

PSD RAPID DIVER OPERATIONS

This class is designed to give the operator the knowledge, skills, and abilities to safely operate a first in Rapid Diver diving system. The class goes over the capabilities, limitations, and design parameters of using this unique piece of rescue gear.

- Students will learn equipment preparation, problem solving, responding to call, scene evaluation, and environmental risks. The diver will learn the strengths and limitations of the rapid diver PSD system.
- Students will also learn and master dive skills to include rapid deployment of the system, diver communication, victim recovery, emergency procedures, and decontamination procedures.
